5. HOSTING AND TRANSFERS ABROAD

Our website and related systems are hosted on the Microsoft Azure cloud infrastructure, in the West Europe (Netherlands) region. Accordingly, personal data obtained through cookies — including strictly necessary cookies — are transferred abroad within the meaning of the Law. That transfer is necessary for the operation of the website and takes place within the scope of the hosting service.

In addition, the analytics and advertising/marketing tools activated where you have given explicit consent are provided by suppliers whose servers are located abroad, and a transfer abroad also takes place in that context. These tools are not activated, and no such transfer occurs, unless consent has been given. Transfers abroad are carried out within the framework of the conditions set out in Article 9 of the Law, namely transfers to countries in respect of which the Turkish Personal Data Protection Board has issued an adequacy decision, or subject to appropriate safeguards such as a standard contract, an undertaking or binding corporate rules. Should you request a copy of the safeguards applied, this will be provided to you with any commercially confidential information redacted.
